**DETAILED ACTION**

1. Claims 1-15 are pending for examination as interpreted by the examiner.

**Response to Arguments**

2. Applicant's arguments filed on with respect to have been fully considered Applicant's arguments, filed 4/14/06, with respect to claims 1 and 7 have been fully considered and are persuasive. The rejection of all claims has been withdrawn.

***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: claims 1-15 are allowed over the prior art because of the references cited in the record, considered in combination or alone, fail to suggest or fairly teach an optical head device including a combination of a diffractive optical element that is divided into first, second, third, and fourth regions by a first straight line that crosses an optical axis of the light and extends in an extending direction of a grating of the diffractive optical element and a second straight line that crosses the optical axis and is perpendicular to the first line and a photodetector wherein a phase of the grating in the first region and the second region located diagonally with respect to the first region is different from a phase of the grating in the third region and the fourth region that are adjacent to the first and second regions and are located diagonally by substantially  $\pi$  as recited in claims 1 and 7. All other claims are allowed with their respective allowable parent claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Cited References***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references relate to an optical head device having a particular grating provided on an optical path and a photodetector for detecting light beams reflected from an optical recording medium.
